

Mohammed Aymane SABER

DevOps Engineer & Full Stack Developer

Fez, Morocco

sabermohammedaymane@gmail.com — +212 632249348

📧 Mohammed-aymane-saber  Mohammed Aymane Saber

Professional Profile

Computer Engineering student at the National School of Applied Sciences of Tetouan (ENSA Tetouan), with experience in full-stack development and cloud deployment. Skilled in designing scalable web applications using modern frameworks and DevOps tools (Docker, Kubernetes, AWS). Currently seeking a **final-year internship (PFA)** in **DevOps and Cloud Computing**.

Education

ENSA Tetouan

2022–2027

State Engineering Degree in Computer Engineering (Expected 2027)

Technical Skills

Languages:	Java, C#, JavaScript, PHP, SQL, Python
Frameworks:	Laravel, ASP.NET Core, React, Angular, Vue.js, Node.js
DevOps & Cloud:	Docker, Kubernetes, GitHub Actions, AWS, Azure, Prometheus, Terraform
Databases:	MySQL, SQL Server, Oracle
Networking:	TCP/IP, DNS, HTTP/HTTPS, OSI Model, basics of routing and network security

Certifications

AWS Cloud Quest - Cloud Practitioner, Containers & Kubernetes Essentials

Professional Experience

Web & Mobile Developer Intern — PROCOM TECHNOLOGY, Agadir

Jul–Aug 2025

- Developed a cross-platform commercial application using React Native (Expo) and Laravel, improving product and sales management
- Designed a responsive admin dashboard with React.js for real-time monitoring
- Integrated REST APIs and optimized backend performance

Projects

VerdeNET – Home Services Marketplace

- Developed a full-stack platform using Vue.js and Laravel with booking and billing features
- Implemented real-time notifications and scheduling system, containerized with Docker and deployed on AWS

Smart Event Collaboration Platform

- Developed a collaborative event management platform using React.js and Express.js
- Designed a microservices architecture (API Gateway, Authentication, Business Services)
- Containerized with Docker and orchestrated using Kubernetes (deployment, scaling, pod management)
- Implemented monitoring and observability using Prometheus
- Built CI/CD pipelines using GitHub Actions

CI/CD Pipeline & Smart Queue Management System

- Developed a queue management system using Laravel and React
- Implemented a CI/CD pipeline using GitHub Actions (build, test, deployment: staging and production)
- Deployed using Docker and Nginx on AWS

Leadership

Project Manager – Medical Caravan aFI – Bghaghza

- Led a team delivering over 1500 medical consultations in 2 days, demonstrating leadership and team management skills
- Coordinated logistics and partners (2 associations, a clinic, and a laboratory), showing strong organizational and adaptability skills
- Ensured effective communication between teams and partners for smooth operations

Volunteer – Hamlat Difea aFI – Sahtryine

- Contributed to resource distribution for over 200 families in rural areas, highlighting responsibility and teamwork

Languages

Arabic (Native), French (C1), English (B2)
